Lisbon Water Museum

Museums play an essential role in education, offering resources that complement learning in both museum and school environments. At the Water museum, interactive exhibitions and activities allow students to have an immersive and practical experience with historical, scientific, artistic, cultural or environmental themes.

These educational resources include guided tours, workshops, traveling exhibitions or audiovisual materials that facilitate understanding of the content displayed.

[EPAL - Empresa Portuguesa das Águas Livres, SA](#)

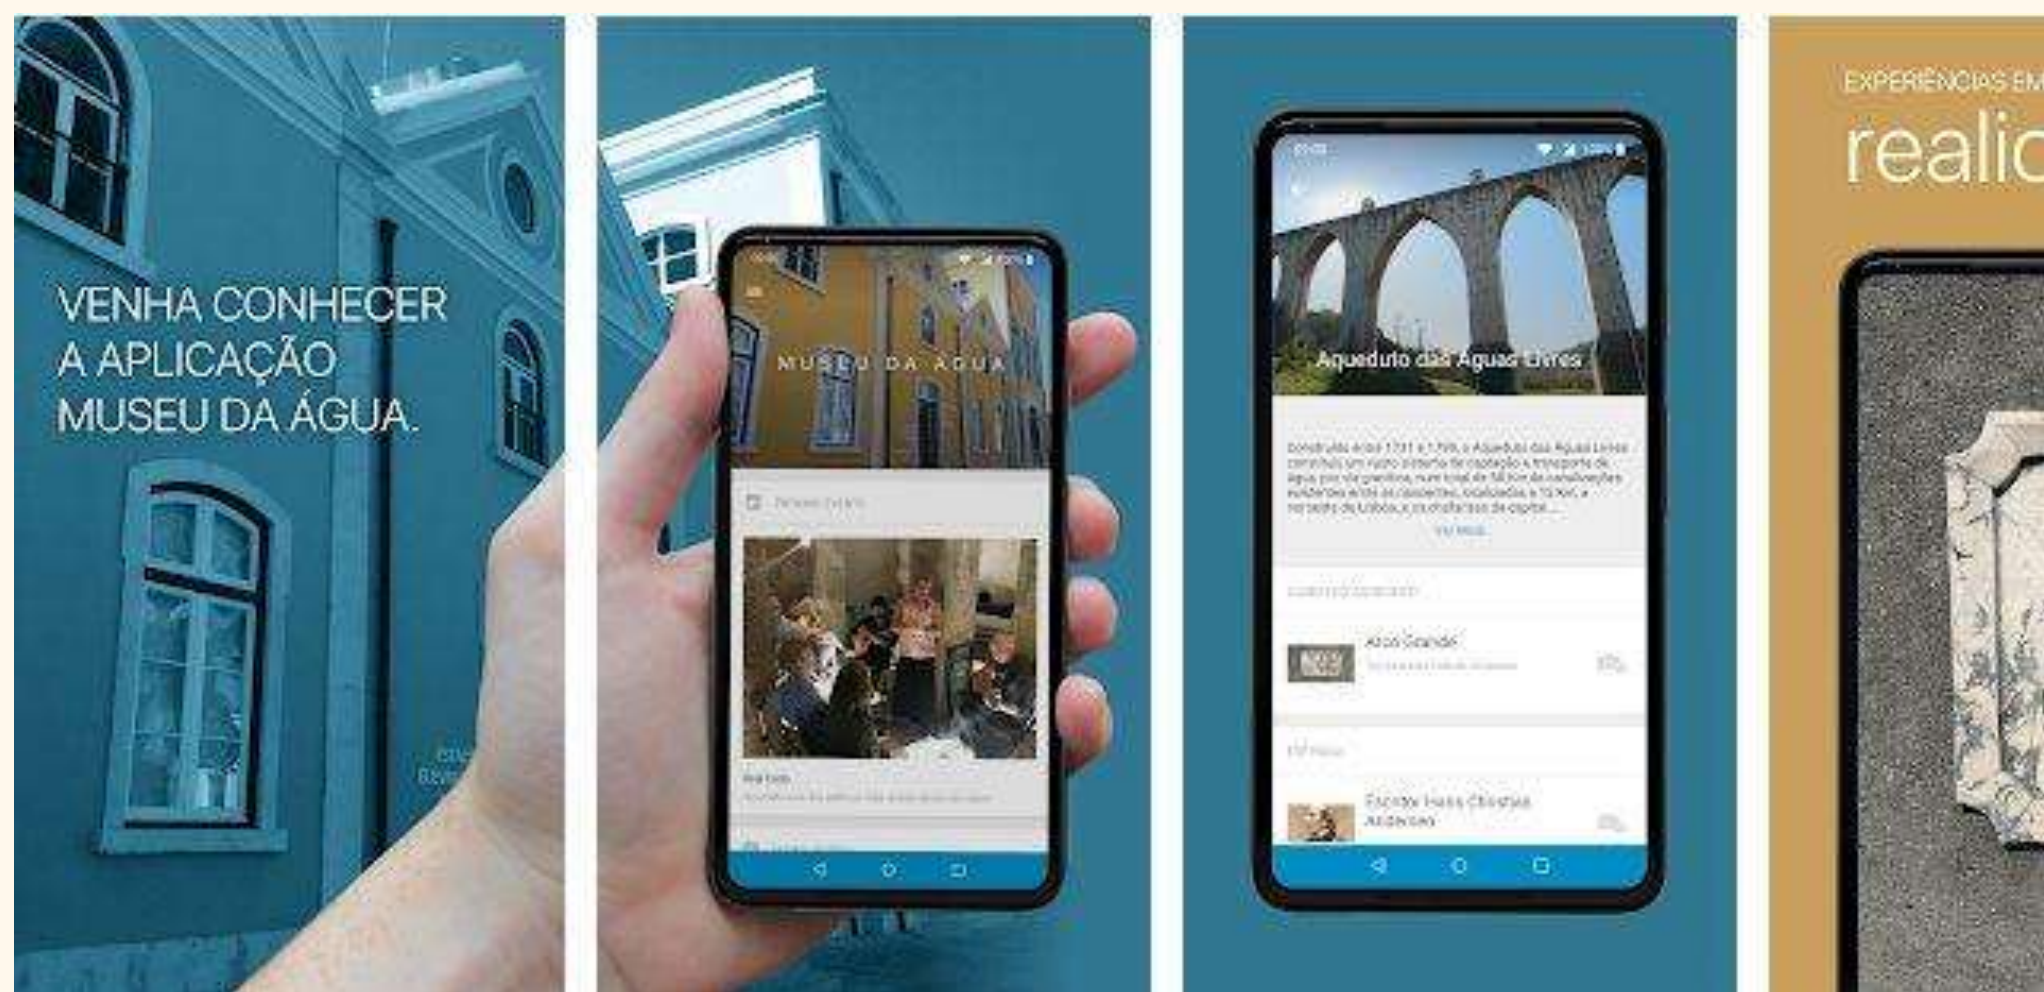

- Total audience 2023 – 131.183 visitors
- 18% of the public were in guided tours
 - 530 – guided tour (schools)

E-learning courses for teachers

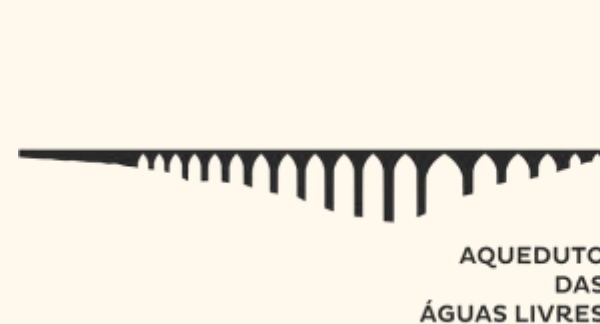

- “Art and education for sustainability” - 30h
- “Environmental Education for Sustainability – 25h

Our contributions:

- The most transferable of our resources, is the video channel “Water in a minute” which explains universal Water Science. So, we suggest the creation of an International repository of online thematic Water Files for teachers and students
- Water game available online for all the countries, like the Aquaquiz. The questions can be translated to all the languages.
- Travelling temporary exhibitions can be produced and then printed by each country.

obrigado
thank
you
